Examiner: Ghatt, Dave A.

For: IMAGE FORMING APPARATUS

Honorable Commissioner of Patents
Alexandria, VA 22313-1450**REQUEST FOR RECONSIDERATION
AND WITHDRAWAL OF FINAL REJECTION**

Sir:

Reconsideration and withdrawal of the final rejection set forth in the Office Action dated April 7, 2005 are respectfully requested.

Claims 1-14, 16-20, 22 and 24-26 are presently pending in the application. Claims 1, 3-4, 7-8, 14, 16-18 and 20 were rejected under 35 U.S.C. §103(a) as being unpatentable over Manzer, et al., U.S. Patent No. 6,256,463 in view of Smith et al., U.S. Patent No. 6,374,066. Claim 2 was rejected under 35 U.S.C. §103(a) as being unpatentable over Manzer, et al. in view of Smith, et al., as applied to claim 1, and further in view of Horie, et al., U.S. Patent No. 5,208,640. Claims 5-6 and 19 were rejected under 35 U.S.C. §103(a) as being unpatentable over Manzer, et al. in view of Smith, et al., as applied to claim 1, and further in view of Nonomura, et al., U.S. Patent No. 6,389,253. Claims 9-12, 24 and 26 were rejected under 35 U.S.C. §103(a) as being unpatentable over Manzer, et al. in view of Smith, et al., as applied to claims 1 and 20, and further in view of Katou, et al., U.S. Patent No. 6,331,004. These rejections are respectfully traversed.

Applicant gratefully acknowledges the indications that claim 22 is allowed and that claims 13 and 25 would be allowable if rewritten in independent form. However, Applicant

Serial No.: 10/602,776
Docket No.: MP-2189M/MAK
NGB.260

respectfully submits that all of the claims are allowable.

Exemplary embodiments of Applicants' invention are an image forming apparatus which includes a first image forming unit having a first printing section for forming a first image on a paper; a second image forming unit having a second printing section for forming a second image on the paper; and a paper conveying unit for conveying the paper from the first image forming unit to the second image forming unit. The first image forming unit further includes a first paper supply section for storing paper and supplying paper stored in the first paper supply section to the first printing section, while the second image forming unit further includes a second paper supply section for storing paper and supplying paper stored in the second paper supply section to the second printing section.

The final rejection contends that Figures 2, 5, and 12 of Manzer teach all of Applicants' claimed subject matter except for the specific teaching that the second image forming unit 10 comprises a second paper supply section for storing paper and supplying paper stored in the second paper supply section to the second printing section. The final rejection then contends that Figure 3 of Smith shows an imaging forming unit have a paper supply section 5 and a printing section 3, and contends further that to one of ordinary skill in the art, it would have been obvious to include the paper storage and supply section of Smith in the second image forming unit of Manzer. This further contention, and the rejections based on it, are traversed.

Smith shows no more than Manzer. In particular, Figure 12 of Manzer teaches that one of the printing units 10 has one input station 30 with a plurality of supply compartments 36 for stacks of single sheets. Figure 3 of Smith shows a printer having one paper supply

Docket No.: MP-2189M/MAK
NGB.260

section with a plurality of paper drawers 5. Smith also shows arcuate surfaces 6 on the paper drawers 5. Thus, one of ordinary skill in the art, viewing Smith and Manzer, would find it obvious to provide the arcuate surfaces of the paper drawers of the one paper supply section shown in Smith to the plurality of supply compartments of the one paper supply section shown in Figure 12 of Manzer. The one paper supply section shown in Smith would not lead one skilled in the art to add a second paper supply section to the one paper supply section already shown in Figure 12 of Manzer.

In view of the foregoing, Applicant submits that claims 1-14, 16-20, 22 and 24-26, all the claims presently pending in the application, are patentably distinct over the prior art of record and are allowable, and that the application is in condition for allowance. Such action would be appreciated.

Should the Examiner find the application to be other than in condition for allowance, the Examiner is requested to contact the undersigned attorney at the local telephone number listed below to discuss any other changes deemed necessary for allowance in a telephonic or personal interview.

To the extent necessary, Applicant petitions for an extension of time under 37 CFR §1.136. The Commissioner is authorized to charge any deficiency in fees, including
